# Upstream work for sustainable recycling

A group at VA-kluster Mälardalen

We

- synthesise knowledge on environmentally hazardous substances in wastewater and sewage sludge,
- search solutions minimizing the spread on hazardous substances,
- collaborate close with the group Micro pollutants, specialized in removing micro pollutants from wastewater.

## Ongoing and planned!

- **Study of literature & data - >report**
- **Communication strategies**
- **Flow with water and sludge, load on soil, crop and recipient**
- **Sources – identification and verification**
- **Upstream removal**

**Please join us!**
