RADISSON RED BRUSSELS
Rue d'Idalie 35
1050 Bruxelles

Every year, millions of tons of valuable by-products are used by our sector as raw materials for making high quality finished mineral fertilizers.

This event will bring together industry experts, EU legislators and national authorities for presentations of case studies on practical uses of by-products. The participants will have the opportunity for a creative exchange of views on different ways to improve the fertilizer regulation and ensure a continuation of good circular practices and economy.

Symbiosis and Circular Economy in fertilizers

**Are by-products a thing of the past ?
Unlocking the new fertilizer Regulation**
